December 19. 1838

General description.

The surface of this Township is very level except in the northern Boundary, which is rolling. It is entirely destitute of running water except near the northern Boundary which is crossed by some small Spring branches running into the Wabash.

The banks of the Slues, Swamps and branches of Rock Creek are scarcely definable, and during the wet season of the year nearly one third of the land is covered

T. 26 N., R. 2 E., 2^d. Mer. Ind.^a

with water. The soil is deep, being from 8 to 12 inches. The timber is not very large but abundant and very tall. Elm is the prevailing timber, Ash & Maple next &c.

The largest portion of land in this Township is second rate.

I hereby certify that in pursuance of a contract with Robert S. Lytle, Surveyor General of the United States for the States of Ohio, Indiana and Michigan, bearing date the 10th day of May 1838, and in strict conformity to the Laws of the United States and the Instructions of said Surveyor General, I have surveyed and subdivided into sections Township N.^o 26 North in Range N.^o 2 East of the 2^d. Principal Meridian, in the State of Indiana; and I do further certify that the foregoing are the true and original field notes of said survey and subdivision, executed as aforesaid.

Certified this 19th day of December 1838

Arthur J. C. Vance

Deputy Surveyor.

I certify that the foregoing transcript
of Field Notes of the survey of Township
N. 26 North, in Range N. 2 East of the
2^d Principal Meridian in the State of In-
diana, has been compared with the orig-
inal on file in this Office, and found to
be correct.

Surveyor General's Office,
Cincinnati, Nov. 22, 1844.

William Johnston
